

Series 20.03 - Mini

Constant, perfect espresso taste. The Mini is the smallest espresso coffee machine in the world in which the temperatures of the steam and the brewing boilers can be independently regulated. It brings about a revolution in the area of traditional espresso coffee machines for household use.

An overview of the convincing advantages:

- absolute temperature stability (DTCS)
- utmost flexibility through independently operated brewing and steam boilers
- low service and maintenance costs
- 30% energy savings with respect to "comparative" machines (in "stand by" operation)
- automatic boiler-filling
- steam boiler (1.5l)
- cold water tank (3l)
- alarm signal (sounds when tank-filling is required)

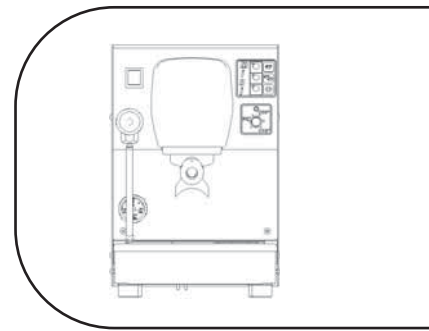

Technical specifications:

Dimensions in mm: l.255 x d.390 x h.350

Thermal output: 1,9 kW max.

Connected load: 230 Volt

Weight: 22 kg
